

# Smart Bulb Installation Guide

## What You Need

- Smart bulb (e.g., Tapo L630, Philips Hue)
- Smartphone with companion app installed
- Stable WiFi connection (2.4GHz preferred)

## Step-by-Step Instructions

- Screw in the smart bulb into a standard socket.
- Turn on the light switch to power the bulb.
- Download and open the manufacturer's app.
- Follow the app prompts to detect and connect the bulb.
- Name the bulb and assign it to a room or group.

## Voice Assistant Setup

- Open your preferred assistant app (Alexa, Google Home, or Apple Home).
- Enable the corresponding device skill (e.g., Tapo, Hue).
- Link your account to the smart assistant.
- Discover devices and test voice commands.
