

Smart Thermostat Installation Guide

What You Need

- Smart thermostat (e.g., Nest, Hive, Tado)
- WiFi connection and mobile app
- Access to boiler or heating control panel

Step-by-Step Instructions

- Turn off power to your heating system.
- Remove old thermostat and note wire labels.
- Install the baseplate and connect wires.
- Mount the new smart thermostat.
- Download the app and follow setup instructions.
- Restore power and test the system.

Smart Features Setup

- Create heating schedules based on occupancy.
- Enable geofencing and learning features.
- Connect to voice assistant for voice control.
